Integrated Pest Management for Multifamily Properties

Acknowledgments

The IPM in Multifamily Housing training program was developed in 2008 by a partnership including National Center for Healthy Housing, National Pest Management Association, Northeastern IPM Center, Pennsylvania IPM Program, U.S. Centers for Disease Control and Prevention (CDC), U.S. Department of Agriculture (USDA), U.S. Department of Housing and Urban Development (HUD), and U.S. Environmental Protection Agency (EPA) with funding provided by HUD, USDA, EPA, and CDC.

This course is based on the training developed by Boston Housing Authority, Boston University, the National Center for Healthy Housing, and Rivard's Resources: IPM using HUD's Office of Public and Indian Housing Notice PIH-2011-22: "Promotion of Integrated Pest Management (IPM) as an environmentally-sound, economical and effective means to address a major resident concern" as the framework for an effective IPM program.

The materials contained herein present a research-based, balanced, and objective approach to pest management in affordable housing and are intended to be used in their entirety. Any nonobjective or partial use of the materials is not recommended. Products, vendors, or commercial services mentioned or pictured in the trainings or presentations are for illustrative purposes only and are not meant to be endorsements.

Project Coordinator

Susannah Reese

Consultation and Editing

Liz Myers	Andy Architect
Tom Neltner	Donald Baumgartner
Michelle Niedermeier	Angela DeFelice
Sean O'Leary	Nina Dutton
Ed Rajotte	Jim Fredericks
